

Inventory Management

Solve the complex problems of managing your inactive IT asset inventory. Let Dynamic handle the storage, return, or redeployment of your assets.

STORAGE + WAREHOUSING

Organizations often lack an organized space to store IT equipment not in immediate use. Dynamic's warehousing service provides a secure environment for storing IT assets awaiting redeployment, lease return, or retirement.

STORAGE + REDEPLOYMENT

After the retrieval process, assets are wiped and prepped for redeployment. This can include device reimaging or reconfiguration aligned with client specifications. Assets are then stored onsite at Dynamic until redeployment.

PREP FOR LEASE RETURN

We coordinate retrieval logistics, wipe data per policy, and document the chain of custody. Returns are tracked by serial number, matched to client lease agreements, and sent to the leasing organization.

SERVICE OPTIONS

- Short-term or long-term storage
- Inventory staging
- Bundled ITAD services such as data wiping, redeployment, or resale

SERVICE OPTIONS

- Serial-level audit reporting
- Sustainability reporting
- Shipped to Dynamic for data wipe and reimaging

SERVICE OPTIONS

- On-site device prep
